Hospital Management

Hospital Management Software is useful for small to medium sized medical businesses such as Super Specialty, Multi-Specialty and General Hospitals of varied capacities, small Nursing Homes, HMOs, Polyclinics and General Practitioners. Hospital Management Software is a comprehensive, integrated medical software designed to manage all the aspects of a hospital operation, such as Patient Registration, Appointment, Medical Billing, and HR / payroll, OPD management and IPD Management, and the corresponding service processing.

We can Design HMS as per your hospital need, to cover a wide range of hospital administration and management processes. It is an integrated end-to-end Hospital Management System that provides relevant information across the hospital to support effective decision making for patient care, hospital administration and critical financial accounting, in a seamless flow.

Hospital Management

The Software provides both clinical as well as patient care aspects to hospital management. The software is divided into different modules, each addressing a specific activity of the hospital and there by facilitating better patient care. Each module can be used as a standalone solution or can be integrated in a phased manner. The Modules are designed so that they meet the present and future requirements of the hospital. This may control organizations, which is Hospital in these case, official documentations, financial situation reports, and also keeps in secure place patients information, patients medical history, prescriptions, operations and laboratory test results..

Hospital Management software is easy to use and eliminates error caused by handwriting. New technology computer systems give perfect performance to pull up information from server

Modules

- ✓ Appointment
- ✓ Registration
- ✓ Consultation (OP)
- ✓ Ward Management(IP)
- ✓ Billing and Accounts
- ✓ Packages and Health Plans
- ✓ Corporate and Insurance
- ✓ Electronic Medical Records
- ✓ Services (Test/Results)
- ✓ Admin and MIS
